After a rate is determined, enter a dollar amount for tax calculation.  
Enter Dollar Amount:  **Calculate**

In this example we are going to examine the different results you would get using the three different Lookup types for the address 10623 Hawthorne Blvd, Lennox, CA 90304-1909.

## ZIP code

The ZIP code lookup feature allows you to choose the jurisdiction you want by entering in a simple 5 digit ZIP code. In this example we will use "90304". This will return results that could include several different communities and therefore may include more than one tax jurisdiction.

Further down, special rules, such as the taxability of shipping are listed and then a map outlining the ZIP code will be provided.

# ZIP+4

A ZIP+4 lookup allows you to narrow down your jurisdiction to within a span of addresses on one side of a street. All you do is enter in a 9 digit ZIP code. For example, entering in “90304” into the ZIP code value, and then “1909” into the +4 value will yield a more specific jurisdiction even though this could still encompass more than one county or city. In this example, the ZIP+4 address returns the city of Inglewood.

City : Inglewood	Dollar Amount :
County : Los Angeles	<b>Use Tax :</b>
State : CA	_____
	Total Sale :

# PinPoint

A PinPoint lookup is the most precise of the three. It validates the U.S. postal addresses and converts the street address into latitude and longitude - also known as geocoding . If you enter in a street address, city, state, and ZIP code it will yield a very specific result. In this example the street address was given as 10623 Hawthorne Blvd, Lennox, CA. The address checks out as valid.

You will notice that the city name is different than the ZIP+4 result and the tax rate is 0.5% less. In this instance, the ZIP+4 lookup was not precise enough to return the correct rate.

**Current results level is:**  
**PinPoint**

After a rate is determined, enter a dollar amount for tax calculation.  
Enter Dollar Amount  **Calculate**

Sales Tax Rate : <b>9.0000% (9%)</b>	Dollar Amount :
Use Tax Rate : <b>9.0000% (9%)</b>	<b>Sales Tax :</b>
Address 1 : 10623 Hawthorne Blvd	_____
Address 2 :	Total Sale :
City : Lennox	
County : Los Angeles	Dollar Amount :
State : CA	<b>Use Tax :</b>
ZIP code : 90304-1909	_____
	Total Sale :

Another nice feature of PinPoint is that if you enter in a correct street address, city and state you can usually ignore the ZIP code and +4 fields. If you enter an incorrect address your results will fall back to the next closest match and show you a message letting you know it has done so.
